

Series 9500 Marine Intercom System

Belt Station
Model No. U9510BS
(Part No. 40795G-03)

U9510BS: Belt Station

DESCRIPTION

The Series 9500 Marine Intercom System is an ideal intercom/radio communications solution for demanding marine operations. Our Series 9500 system provides a reliable and effective solution for high-noise workboat environments, such as law enforcement/homeland security, border patrol, fire/rescue boats and special operations.

The U9510BS Belt Station has been specifically designed for harsh marine environments. The housing and controls have superior resistance to the elements, providing years of dependable service.

The units have a 2-position rocker switch that allows for the following communication modes:

- IC – Microphone is off, and the Push-To-Talk (PTT) switch is used to talk over the intercom. Typically used in extreme noise environments.
- RAD – Microphone is on, or “hot”, for hands-free intercom. PTT is used to transmit over the selected radio. Standard mode of operation.

The U9510BS also provides connection to a portable radio (via C95-62PR and C6200 adapter cords), allowing the user to disconnect from the intercom system and board a second craft (boat, helicopter, etc.), while maintaining communications.

FEATURES AND BENEFITS

- Provides crisp, clear communication in demanding environments
- Dual modes of operation (hands-free intercom or PTT intercom transmit, both full-duplex)
- Corrosion resistant, weather-tight, RFI shielded enclosure and controls
- **U9510BH Belt Station Holster** (not included), ballistic nylon with adjustable velcro; allows user to wear the U9510BS on their belt or elsewhere on their person.
- Connectors with protective caps for headset, belt station cable and portable radio cable
- Momentary PTT for intercom/radio transmit (depending on selected mode of operation)
- Headset volume control (mono)

TECHNICAL DATA

Enclosure	Polycarbonate, Black
Size (Housing)	4- ³ / ₈ "L x 2- ³ / ₈ "W x 1- ¹ / ₄ "H
Operating/Storage Temp.	-20° to 70°C
Humidity Range	0-95% non-condensing
Weight	8 oz./227g.
Push-To-Talk Switch	Momentary, DPST
Volume Control	Var. Resistor, 1KΩ
Connections (Quick Disconnect)	- Headset (5-pole, Green) - Belt Station Cable (7-pole, Red) - Portable Radio Cable (6-pole, Yellow)
